

Clinical & Translational Research: Trial Design Considerations & Practical Approaches

Description

This workshop on clinical & Translational Research Trial Design Consideration and Practical Approaches will provide attendees with an interactive learning opportunity to apply rigorous design thinking for their acupuncture or related intervention study.

Learning Objectives

- 1) To learn about the key features for high-quality acupuncture clinical trials
- 2) To learn about the practical clinical trial design using the PICOTS framework
- 3) To learn the appropriate use of biomarkers for translational research
